

Public furniture designed to begin something.

THE NEST

Shelter, suspended lounge space, climbing, and an elevated lookout.

PYRAMID PEAK

A climbable social landmark with overlooks, steps, and gathering spaces.

HONEYCOMB

A modular system for seating, tables, play, storage, and space-making.

GENERAL U.S. PLANNING RANGES

Choose a starting point, not a fixed product.

01	Planning + Site Fit	\$7,500-\$15,000
02	Modular Installations	\$25,000-\$100,000
03	Signature Structures	\$100,000-\$250,000+

Ranges are directional. Final budgets depend on configuration, materials, engineering, accessibility and safety review, site conditions, foundations, surfacing, freight, installation, permits, and schedule.

TYPICAL PROJECT PATHWAY

From useful question to installed place.

01 Site fit

2-4 weeks

Outcome, audience, site conditions, concept fit, and an initial budget path.

02 Concept + budget

4-8 weeks

Configuration, materials direction, stakeholder input, and scope alignment.

03 Engineering + approvals

6-16 weeks

Technical design, accessibility and safety review, permits, and fabrication documents.

04 Fabrication + install

8-20+ weeks

Production, site preparation, freight, installation, and handoff planning.

PUBLIC-SPACE REALITIES, ADDRESSED EARLY

Durable exterior materials | Structural anchoring | Accessible routes and varied seating | Replaceable components where practical | Maintenance and inspection responsibilities

Bring a site, a human outcome, or an unfinished idea.
